

What is the  
mission of New  
Generations and  
our progress?

## **The Mission of New Generations:**

**“We work with God to:**

---

**Catalyze Disciple Making Movements Everywhere.”**

**Why this Yearly Core Sampling?**

**To regularly conduct 3D-Evaluation of the Fruit.**

**Accurate information is critical to success!**

Why invest in  
an opportunity  
like a **Yearly  
Core  
Sampling?**

---

Mini-DBS:  
Proverbs  
27:23-24

Vs 23

- What are shepherds to do?
- What are indicators of a flock's condition?

Vs 24

- What happens with lack of attention?

**Every DMM team pauses regularly  
to evaluate deeply by listening to God,  
to gain insights that shape their strategy!**

## Two Key Results we're offering:

1. A celebration of what God is doing
2. Ownership of the YCS: Not a Project, but a life commitment of evaluation to see engagements reach movement

# Evaluating Fruit

## 3 Dimensions of a Movement

DEEP

- Delicious apples – quality transformation

WIDE

- More apples – constant replication

LONG

- More apple trees - generations

# **Three Essential Questions**

The Yearly Core Sampling is asking three essential questions:

- 1. What are the attributes of the spiritual DNA that mark the Engagement at the level of Disciples, Groups, and Leaders?**
- 2. How is spiritual DNA being transferred from one generation to the next of disciples, Groups and leaders?**
- 3. How many of the original churches are still active and replicating?**

# 4 Stages of an YCS

## 1. Preparation

- Pray for God to Speak
- Randomize all engagements
- Then randomize church leaders of those selected engagements
- Connect with local leaders
- Set dates & train the team

## 2. Visit

- Conduct Individual Interviews
- Focus Group Interviews
- Leader Interviews
- Observe a Gathering

## 3. Core Analysis

- Debrief with local team
- Leaders listen to a summary of the recordings
- Celebrate strengths & plan to fan the flame
- Strategize to course correct

## 4. Regional Analysis

- Regional Leaders listen to recordings of various YCS
- Analyze data for the whole region
- Draw conclusions of what to Celebrate
- Strategize how to adjust training

## Evaluating the Fruit

# 3 Approaches

Individual Interviews: 3  
ordinary disciples, the  
church leader (pastor) &  
their coach

Focus Group – with a  
gathering of believers

Observe a Gathering

# STEPS OF THE YEARLY CORE SAMP

- 1). **Pray & Count the Cost** - in order to see healthy evaluation happen we will bath the process in prayer and consider the investment it will take with leaders and participants. (Scripture- Add quote from IQA - Research is Spiritual Warfare)
- 2). **Clarify your engagements** - each region will have a quota to reach for their part in margin of error necessary. The team will gather a list all the engagements (including movements) in the region and randomize them on this website and send the results to the SST. (ie for East Africa - 114 engagements in EA, they randomize the list for the 16 engagements chosen by the computer). In order for this to be reliable and objective - we can't pick our favorite engagements. Partition of Engagements for YCS per Region needed here.

# STEPS OF THE YEARLY CORE SAMP

3). Clarify the groups & gatherings to evaluate - similarly to maintain integrity in the randomization process:

A). If the engagement is a **movement** you will make a list of all the churches in the 4th and 5th generation and then randomize them at this website and submit the top three churches in the resulting list.

B). If the engagement is **not yet a movement** but larger take all the churches in the highest 2 generations of churches at this website and submit the top three churches in the resulting list.

C). If the engagement is newer with not enough churches yet, then select the highest 2 generations of DBS groups at this website and submit the top three churches in the resulting list.

# STEPS OF THE YEARLY CORE SAMP

4). **Secure field collaboration** - secure the involvement of the regional coordinator, the SICs and the local engagement leaders who will part of the evaluation process of the YCS. You will need a large team to help with the details of the YCS: Reach out to the country coordinator who mobilizes engagement leaders in this process.

- A). Creating a demographic profile of the engagement
- B). Find people to translate & those who will interview if necessary
- C). Figuring out transportation to the each of the 3 churches of each randomized engagements & engagement leaders

Determining who will be interviewed from the Three churches

- the 3 ordinary disciples • a focus group • the leader
- the gathering to observe
- D). Logistics of food & lodging - developing a budget
- E). A team to analyze results including an understanding of the worldviews
- F). People to think through security issues. (ADOPT THE IQA PPTX)

# STEPS OF THE YEARLY CORE SAMP

## 5). Prepare the Assessment Questionnaire -

Translate & contextualize the qualitative and quantitative questions

- The Disciple questions are asked of the disciples
- The Disciple & Church questions are asked of the focus groups
- The Disciple, Church & Leader questions are asked of the leaders

## 6). Train the Team

- Train interviewers how to ask open ended questions, listen well & ask follow-up questions. In order to have a good interview - the interviewer needs to be humble, filled with the Spirit and ready to be curious enough to ask open questions that help people share their stories. (SST members train **SICs & strategic** coordinators to be interviewers from inside the engagement)
- Train the team how to use the recorders (ESP training)
- Train the translators - if simultaneous translation is needed
- Train leaders so that you can Run several engagements simultaneously (training leaders and deploying them at the same time)

# STEPS OF THE YEARLY CORE SAMP

## 7). Debrief with the Local Engagement Team (RECORD YOUR DISCUSSION)

- Daily debrief with the team & share comments for each interview
- Share their impressions with the team about:
  - Areas of Strengths - **use DMM Evaluation DNA list**
  - Areas of drift - **use DMM Evaluation DNA list**
  - Observations about impressions of the interviewees
- Obstacles you encountered & how you overcame them
- How might the questionnaire be adjusted to get a better picture
- How can we be more effective tomorrow?

## 8). Compile your findings (Day 4) & do your Core Analysis

- Take the findings from the 15 interviews from the 3 churches (Listen to the 3 Summaries)
- Spend time analyzing it 1st with the local team
- Turn the information into insight
- Develop a strategy on how to fan into flame the strengths and course correct the areas of drift

# STEPS OF THE YEARLY CORE SAMP

## 9). Generate two reports:

- 1). **Core Analysis Reports** - analysis the local engagements leaders developed  
*Just use the recording of the Core Analysis to generate a transcript.*
- 2). **Secondary Analysis** is done by regional team with all engagement details

Both should be sanitized for security reasons with an executive summary  
Both reports should have many areas of celebration (Strengths of the DNA)  
And they should also include areas of drift (weaknesses of the DNA)  
Finally include an action plan of what to do to improve
